

REFORCE Detoxifying Tonic 1/T

Product Scalp activator tonic with detoxifying action, with Silver Fir Essential Oil and DETOX-Complex.

Performance Innovative purifying and detoxifying formula for scalp treatment: it prepares scalp to undergo further treatment by 'neutralizing' environmental polluting agents, removing impurities and actively stimulating blood microcirculation.

Hydro-alcoholic formula, exclusively for professionals, it is proposed as the best approach to MEDITER Professional programmes dedicated to anti-hair loss adjuvant treatment (REFORCE) and to the normalization of flaws caused by sebum and dandruff (THERAPY Balancing and THERAPY Purifying).

Professional Massage and the Kenogen stage.
Reduction of hair density can be caused by temporary empty follicles in Kenogen stage: the professional massages proposed by the REFORCE programme can obviate the problem by reducing the duration of the Kenogen stage.

The unsticking massage, combined with the application of the REFORCE Detoxifying Tonic, is a professional preparatory treatment aimed at the improvement of cutaneous microcirculation as well as at the temporary reactivation of the hair cycle, inducing follicle Anagen stage.

Use On dry hair, spray the product directly on the scalp.

Perform a delicate *unsticking massage*, leave it to act for a few minutes then proceed with the application of the following cleansing treatment.

Plus **WHITE FIR ESSENTIAL OIL.** Oil extracted from the buds, it features recognised balsamic, purifying and tonic properties stimulating blood microcirculation.

DETOX-COMPLEX. It is extracted from cress sprouts, then purified, concentrated and finally encapsulated in liposomes.

It is rich in sulphoraphane, a phytonutrient ('substance which is beneficial to health') able to activate the detoxifying system of the skin, and is considered a second generation antioxidant which enhances cell resistance against aggression carried out by environmental pollutants while performing anti-ageing action.

DETOX-COMPLEX purifies and protects skin against the action of harmful substances, stress environmental factors and environmental pollutants, like cigarette smoke, exhaust gas, smog, endotoxines and heavy metals.

Dermatologically Tested Formula

Size 125 mL – cod. 107
