REHUB+ SPECIALIST KERATIN MULTILEVEL TECHNOLOGY

New strength and beauty for damaged hair

Sun, sea, wind, excessive and incorrect use of hair dryers and straighteners and chemical treatments can cause alterations in the structure of the hair, making it dull and dry, weak and with split ends. Helen Seward launches the solution:

REHUB+ SPECIALIST is born, the efficient, professional treatment for the instant repair of damaged hair, which offers a fortifying and regenerating action. In just 3 steps, REHUB+ Specialist allows targeted and immediate action on damaged hair, with deep

regeneration through the formation of new internal bonds, transforming the quality and appearance of the hair by sealing the cuticle and split ends, restoring body and integrity for stronger looking hair that's resistant to breakage and exceptionally soft and shiny.

STEP N. 1

REBUILDING FILLER

Instant anti-breakage reconstruction filler. Penetrates the hair fibre and strengthens it, generating new multiple bonds. Repairs damaged hair, restoring body and the resistance of healthy hair.

STEP N. 2

REGENERATING TREATMENT

Split ends sealer regenerating treatment. Seals the cuticle and split ends with a long-lasting smoothing action. Offers buoyancy and extreme softness without weighing down the hair, restoring the damaged hair fibre to its healthy condition.

STEP N. 3

FINISHER OIL

Thermo-protective perfectioner oil. Featuring an anti-frizz action, it offers a special and unique velvety finish, extraordinarily highlighting the hair's shine.

REHUB+
specialist

The high performance of the formulas is based on powerful, natural active ingredients that act in progressive combination with Keratins and Argan Oil.

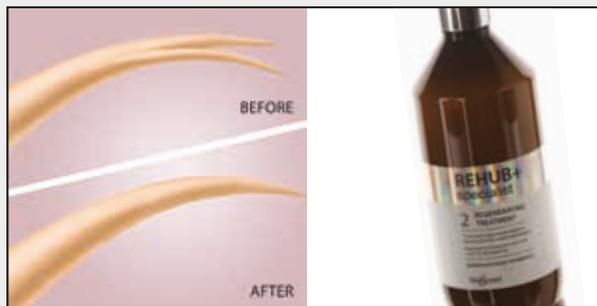

REHUB+ SPECIALIST acts on different levels:

LEVEL 1

Instantly generates new multiple bonds within the hair fibre, performing an anti-breakage action and repairing the fibre from the inside, fortifying it and restoring body.

LEVEL 2

Performs an external smoothing and long-lasting sealing action on the cuticle and split ends, restoring the hair's original structure.

LEVEL 3

With a thermo-protective, anti-frizz action and velvety finishing effect, it enhances the shine of the regenerated hair.
